

Creative Developer & Designer

hello@iosgc.vip • iosgc.vip

SUMMARY

Developer and designer focused on building fast, elegant and dependable digital products.

Comfortable across the whole stack: from interface design and design systems to Node.js backends and deployment.

SKILLS

Frontend: HTML/CSS, JavaScript, TypeScript, React / Next.js, Vue

Backend: Node.js, Express, Python, PostgreSQL / SQLite

Design & Motion: Figma, Design Systems, GSAP, Framer Motion

Tools: Git, Docker, Linux, Nginx, CI/CD

PROJECTS

Nebula Dashboard AI-driven data visualization platform (Graduation project, 2025)

Independently designed and built a real-time analytics dashboard; natural-language queries compiled to a whitelist-verified query DSL. Next.js, TypeScript, D3.js, FastAPI, PostgreSQL.

Lumen UI Lightweight React component library (Open source, 2024)

Token-based theming, zero runtime dependencies; bundle size ~1/5 of comparable libraries.

Echo Minimal blog engine (Personal project, 2024)

SSR + SQLite single-file storage; Lighthouse 98+, TTFB < 100ms on a small VPS.

EXPERIENCE

Frontend Engineer Intern Startup (2023)

Shipped customer-facing features, improved LCP by 40%, introduced component conventions.

Freelance Web Developer (2022 - Present)

Delivered 10+ websites for individuals and small teams, from design to deployment.

EDUCATION

B.Eng. in Computer Science and Technology (2021 - 2025)

Outstanding Graduation Project award (Nebula Dashboard).
